

Entrepreneur-in-Residence (EiR) Program

Our Entrepreneur-in-Residence program offers aspiring technical entrepreneurs a proven path to build deep-tech companies around a vetted university technology in 12 to 24 months.

This means you don't need to have a "big idea" to start your own company!

The Process

Over the course of the program, we will support you in your search for a co-founder and in scouting for a technology. We provide pre-seed financing, office space, infrastructure, as well as our expertise and mentorship to guide you through your journey to building a successful startup.

This journey will lead you, as a co-founder, to designing a prototype, building your team, recruiting a seasoned CEO and finally raising early-stage investment – all while being supported by our experienced team.

At the end of the program, you will graduate from TandemLaunch with your own deep tech startup!

How do you apply?

You can apply by filling out the submission form on our website by [clicking here](#).

Further selective steps include an interactive three-week **Qualification Phase** which will prepare you for developing a deep tech startup. Successfully completing this training program is a requirement for admission in the EiR Program.

Still have questions? [Contact us](#).

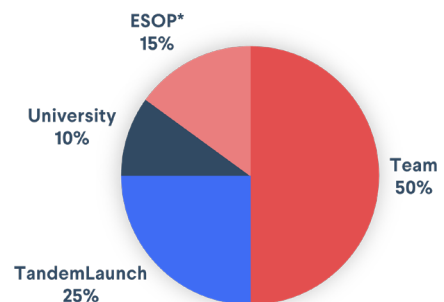

Who is this program made for?

- **PhD** in Electrical/Computer Engr., Physics, Computer Science, or similar technical fields
- **MS** in the above subjects with industry and/or technical project management experience
- Great communication skills and a passion for entrepreneurship
- No business knowledge or previous entrepreneurship experience required
- Previous experience in positions of leadership is a plus
- Technologists who like solving highly impactful scientific problems

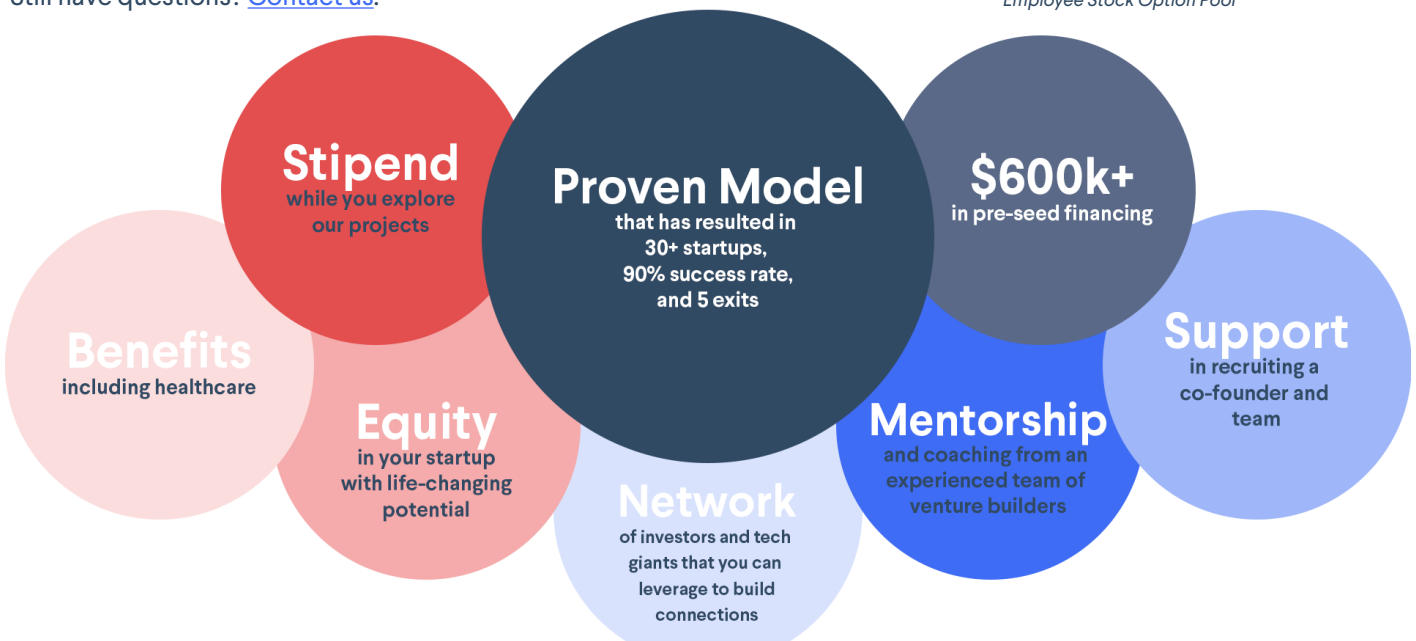

What's in it for you?

- The unique chance to grow into the role of a co-founder
- Hands-on mentorship and guidance from our experienced venture team
- \$600k+ in pre-seed funding
- A stipend while you explore our projects
- Valuable equity in your startup with life-changing upside potential
- Healthcare and dental benefits
- Office space & day-to-day operational support
- Access to our expansive network of investors, industry leaders, and entrepreneurs
